Subject: PCBs in caulk Q&A

Here is the current Q&A that is public.

http://www.epa.gov/pcbsincaulk/pdf/caulk_faq.pdf

It includes the following cleaning measures (this is public):

Other actions to minimize exposure include:

- Clean frequently to reduce dust and residue inside buildings
- Use a wet or damp cloth or mop to clean surfaces
- Using vacuums with high efficiency particulate air filters
- Do not sweep with dry brooms; minimize the use of dusters near areas with caulk
- Wash children's hands with soap and water often, particularly before eating• Wash children's toys often
- Wash hands with soap and water after cleaning, and before eating or drinking.

You may want to consider including one or more of these measures as conditions in a risk based approval.
